

**Isn't it time that current manufacturing processes were reinvented?
ProWorks, simply put, is a revolution in manufacturing.**

The current manufacturing process - or paper paradigm - is bogged down by rigid, outdated modes that prove to be ineffective and stagnant. Procedures are unable to react to changing circumstances.

ProWorks is an entirely new paradigm with entirely new assumptions based on the best computing and networking capabilities in the 21st century. ProWorks is leading a revolution in the manufacturing industry. Processes are dynamic and changing, reflecting the fast-paced world in which we reside. Leveraging new technology, procedures are interactive and engaging. We are only as effective as our manufacturing processes.

Electronic Work Instructions (EWI) has moved into tomorrow.

Are you going to be left behind?

Manufacturing: 100 years ago versus Today

Don't be fooled! A static PDF document is the same as a rigid paper document. Interactive and adaptive EWI goes far beyond a digital piece of paper.

Discover how Proworks can revolutionize manufacturing processes to provide a more efficient and adaptive capability!

COME SEE US AT OUR BOOTH

**IPC APEX SHOW 2017
San Diego Convention Center
February 14th - 16th, 2017
Booth # 922**

ANNOUNCEMENT

ScanCAD is presenting two papers at APEX this year
You are invited to the presentation of these papers

Tuesday February 13th

3:30 pm to 5:00 pm Technical Session

Bill Loving presenting:

*Managing the Diminishing Supply & Obsolescence of PCBs for Legacy
Systems*

Wednesday February 14th

3:30 - 4:30 pm Technical Session

Jeff Rupert presenting:

Embracing a New Paradigm: Electronic Work Instructions (EWI)
